DON'T BE A DOPEY DAN ON A BIKE

Don't hitch behind cars & trucks.

Don't zig-zig from side to side.

Don't carry passengers on your
bike.

Don't ride without your hands.

Don't ride so fast. You may lose
your balance or be unable to stop,
quickly.

Do signal before turning.

Do ride on right side of roadway.

Do wear white when it gets dark.

Do use a headlight and a red rear
reflector.

-Phil Holloway-4

SIGNS OF SPRING

Spring is the season of the year between winter and summer. In the Northern Hemisphere, Spring begins on March 21st. and lasts until June 21st.

On March 21st., the sun crosses the equator and starts northward. As it travels north, its rays strike the northern countries more directly each day, and the weather grows steadily warmer. In the Southern Hemisphere, Spring begins in September and ends in December.

Spring is the time when life begins again, in nature. Birds return from the south. Trees become leafy again, and flowers begin to bloom. The farmer plants his crops. In many countries, the people have festivals, celebrating Spring.

-Diana Foutty-5

**

EASTER

Easter is celebrated because on that day, Christ rose from the dead. Easter takes its name from that of a goddess named Eostre who represented light or spring. A festival in her honor was held every April.

There is usually an Easter parade. The idea of Easter eggs originated in Persia. The legend says the eggs are laid by the Easter rabbit on Easter Eve.

The annual date for Easter, is the first Sunday after the first full moon on or after March 21st.

This year, Easter is on April 21.

-Lucretia Fitzgerald-5

**

PALM SUNDAY & GOOD FRIDAY

Palm Sunday is the Sunday before Easter Sunday. It is called that because on that day we celebrate Christ's last entrance into Jerusalem before His Crucifixion.

Palm branches were strewn in His path by the people.

In some churches, palms are used as decorations on this Sunday and pieces of them are given to the people.

Good Friday is the Friday before Easter Day. It is observed in Christian Churches as the day on which Jesus was Crucified. This has been done from very early days, by fasting and special prayers.

In Roman Catholic Churches, special services, or masses, are held. Many Protestant Churches observe the day with a service held from twelve noon to 3:00 P.M. when Jesus hung upon the cross.

-Andrea Wilson-5
**

MANSFIELD'S SCHOOL PATROLS

Most people don't know why or when the school patrols were started in Mansfield.

In 1926, a boy going to Marion Ave. School was killed at the corner of Park Ave. West and Douglas, at the school crossing. Something had to be done!

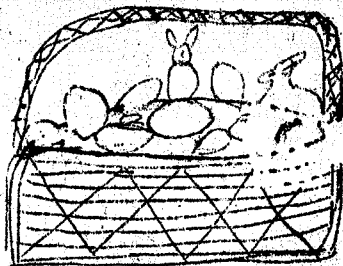

Commissioner Boals, of the police force, and Floyd Dent, Boy Scout executive director, went to Canton to see how the patrols were operated there. When they came back, Floyd Dent suggested that Boy Scouts patrol the crossings until regular patrols could be organized.

In 1927, the school patrols were organized and they were sponsored and financed by the Richland County Auto Club.

Now there are 365 patrol boys and girls in Mansfield that cover 18 schools. The specific reason for the patrols is to help the children cross streets safely. There hasn't been a fatal accident at school crossings in Mansfield since the patrols organized. We are celebrating our 30th anniversary this year.

THE LAWN FETE

On June 11th, there will be a Lawn Fete at North Lake Park. The boys and girls of Grubaugh School will sell tickets. Further details will be in our next issue of the Western Wind-Up.

-Dennis Frost-5

**

MARBLES ON THE PLAYGROUND

In our school, we can play marbles. We play outside. We can not play inside the school building. We do have a few rules about playing marbles.

1. Don't play for keeps.
2. Play fair.
3. Don't play on the flagpole.
4. Don't play on the sidewalk.

-Steve Hunt-5

**

SCHOOL ART EXHIBIT

I went to Kingwood Center to see the school art exhibit. The article I liked best was a snowman. He was made of snowflakes. He had a black hat and red mittens on. He was sitting on a white plaster-paris platform.

There, also, were funny masks, marble figures, homemade dolls, maps made with water-salt-and flour, paintings, a background for a Tom Sawyer play and many other things.

-Lucretia Fitzgerald-5

**

AFTER SCHOOL ACTIVITIES

Wednesday, every week, the

5th and 6th grade boys go to the Gym to play. If there are any 5th or 6th grade boys that are interested, please come to the Gym on Wednesday at 3:00 P.M.

-Jim Berry-5

**

SPEAKER

Judge Charles Freehaver, of Mansfield Probate Court, spoke on "Adoption and Probate Matters," at Mothers' Club, March 21st. He is the Probate Judge of that court.

Nominating Committee was appointed and refreshments were served in the cafeteria.

-Jeannette Hill-5

**

WHAT THE P.T.A. IS DOING

This month, the P.T.A. is having a Gym show. There will be boys and girls from Grubaugh school, dancing, playing socker, tumbling, and other things. Mr. Strine will be in charge. It will be in the Grubaugh School Gym at 7:30 P.M., April 9th.

-Hank Kocial-5

**

SPORTSMAN SHOW

The tumblers of Grubaugh School went to the Sportsman Show. We went the 8th of Mar. We went through all our stunts. We got free cokes. We did: flips, back to back and over, and double roll.

-Cynthia Petan-5

**

WHAT THE WEBBLOWS DO

The Webblows are trying to make the boys to be able to become good Boy Scouts. First we have to say and know the Slogan, the twelve points of law, Promise, and the motto without the book. We are going to learn how to tie knots, build things, and how to help others, at all times. We meet every Wed. at 7:00 P.M. You have to be 10 and a half to be a Webblow. You will find out where to meet, when you become a Webblow and are a lion in Cub Scouts.

-Hank Kopcial-5

**

BOY SCOUTING

I am a Boy Scout of troop 2. We have been studying First Aid. We are learning how to fix broken arms. We work on other boys, in our troop.

Our troop leader is Mr. White.

-Jim Berry-5

**

GIRL SCOUTS

In our Girl Scout troop, the girls have taken several trips. Sunday, we went to St. Mathews Church, Thursday, we went to Mrs. Ezzard's to see her things from Japan. Saturday, we went to the Girl Scout party.

Later we will put on a skit for our mothers' about "School Days."

I enjoy Scouts very much.

-Karen Noblet-5

**

EDITORIALS (cont'd)

ST. PATRICK'S DAY

St. Patrick was born at Bannaven, England. Patrick is the English name for Patricius. St. Patrick had a life full of adventures. At the age of 16, he was

captured by pirates. They took him back and set him to tending the flocks of a chieftain. Six years of slavery made him a Christian. He escaped to France and became a Monk. In 432, a vision led him to return to Ireland as a missionary Bishop. His labors were so successful that he came to be known as one who "found" Ireland, all heathen, and left it all Christian. Over 300 churches were founded by St. Patrick. St. Patrick's Day is celebrated throughout the world.

-Dicky Ezzard-5

**

ANDREW JACKSON

Andrew Jackson was born March 15, 1767, near Waxhaw Creek, in Lancaster County, South Carolina. His Father, was a poor farmer of Scotch-Irish descent. He had emigrated from Ireland in 1765 and settled on Twelve-Mile creek, near the present boundary of North and South Carolina. His Wife, Elizabeth Hutchinson Jackson, came to America with him. When Andrew Jackson grew up, he was elected our seventh president.

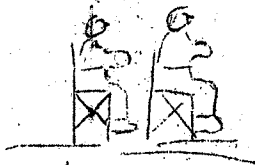

-Richard Lomax-5

**

DATES OF IMPORTANCE

1. Hawaii annexed by U. S. A., 1898.
2. Gold Rush to Alaska, 1879-1899.
3. Battleship "Maine" blown up in Havana Harbor, 1898.
4. American Baseball League founded, 1900.
5. Open-Door policy for China established, 1899.
6. Major Walter Reed conquered Yellow Fever, 1900.
7. Boxer Rebellion in China, 1900.

TAPE RECORDER

In Mrs. Barker's room, we have tried singing, on the new tape recorder. We sang some of the songs that we are going to sing in the Mansfield Choir, then we played back, the tape recorder, to see where our bad mistakes were. We have enjoyed using the tape recorder and sometime next week, we are going to read aloud, out of a book, and see where our bad mistakes, in speech, are.

-Sue Herrick-6
**

OUR LETTERS

In our language class, we wrote letters to Mexico and Mexico City to get information about them. Some of the children have already received their replies. Others got their letters back because the address was incorrect. We had fun doing it and it was very educational.

-Kelmer Berry-6
**

KINGWOOD CENTER

On Thursday, March 14th, we took a trip to Kingwood Center to see the art exhibit. We saw many interesting things from other schools and many from our own school. We were especially pleased

to find a picture painted by Janet Wallace, and a relief map made by Kelmer Berry, Dennis Traicoff, and Roger Griebeling, and four children from our own room.

-Karen Thomas-6

MEXICO CITY

Mexico City is the capital of Mexico, and is the oldest capital city in North America. It is in the Valley of Mexico, which is located in a thickly settled region and is also in a rich farming and mining area. The city is built on a plateau 7,440 feet above sea level.

The city has had rapid growth in population. In 1921, it had a population of 615,367. In 1930 it had 959,524. Today the population is 2,233,914.

There has been a great development in industries, in Mexico City, in recent years. The city has more than 350 manufacturing plants.

Mexico City is the transportation center of Mexico, and is also the center of the railroad system of Mexico. It also

MRS. BARKER'S ROOM (cont'd)

has a modern airport. There are over 200 miles of streetcar lines in the city.

In Mexico City, there are old Aztec Temples and new skyscrapers. There are many famous buildings. The National Cathedral is one of the largest and finest in the Western Hemisphere. The cathedral is 300 years old. Another famous building is the National Palace.

Mexico City has many public squares and parks.

Every year a great number of tourists go to Mexico City. It is easily reached by the Pan American Highway, from Texas.

HOW THE FIRST NEGRO SLAVES CAME TO CENTRAL AMERICA

Over in Central America, the Spanish always needed more workers to work on the farm.

Spanish colonists were not supposed to trade with other countries but they broke the law because Spanish ships did not have enough goods or slaves.

In the year 1641, a Portuguese ship wrecked near the coast of Honduras. The ship was coming from Africa with Negroes for slaves. The Negroes swam ashore after the wreck. They were right at home in that climate so they knew how to live there.

Before long, the Negroes met some Indians. The Negroes and Indians lived together. Their descendants are part Indian and part Negro. These people are called Zambos.

Later, more Negroes came to Central America. They went all over Central America and did many jobs. Some places have many more Zambos than other places.

-Jerri Cline-6

**

BIRD SCRAPBOOK

Our room is studying about birds in the world, for Spring. We are going to make a scrapbook about different birds. Some things we are planning to do is make a picture of the birds we have, draw the nest, make up a poem, for the bird and find a poem from a book. We, also, have to study about the bird so that we can make a report about the bird. The covers will be made out of colored paper. For designs we will have white paper, and with our fingers, will make the design of our birds tree, with the bird on it.

-Karen Echols-6

**

NEW YORK CITY

New York City is the largest and greatest city, in the world. Its population is 7,891,957. It covers an area of 322.83 square miles.

New York City is made up of five boroughs which are: Manhattan, The Bronx, Queens, Brooklyn, and Richmond. Queens is the largest and Manhattan is the smallest and the most important.

The Empire State Building is the largest of all the skyscrapers. It was built in 1931 on Fifth Avenue. It is 102 stories tall.

The Flatiron Building was the first skyscraper built in New York City. It is 21 stories tall. The building got its name from its shape, of a triangle, which makes it look like an old-fashioned

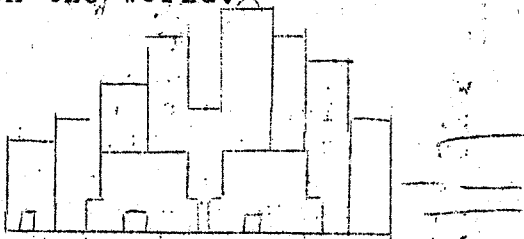

MRS. SHERMAN'S ROOM (cont'd)

flatiron,

The Rockefeller Center is made up of fourteen buildings, of which the R.C.A. Building is the largest.

There are about 3,000 churches of various faiths in New York City.

These are only a few facts about New York City. Now you know why it is called the greatest city in the world.

-Sue Stocker-6
**

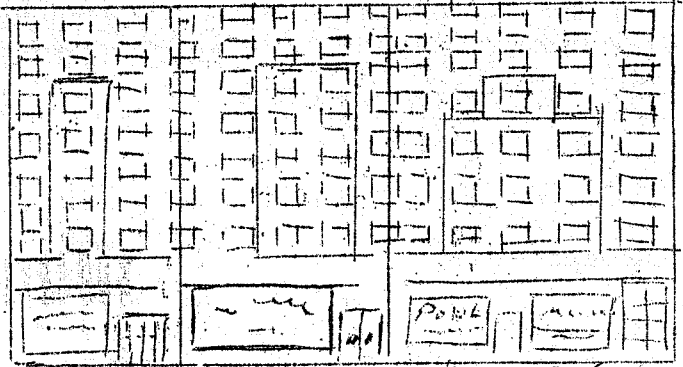

CHICAGO

My illustration shows the tall skyscrapers of Chicago.

The beginning of Chicago dates back to 1777, when a San Domingo negro settled there as an Indian trader. In 1803, he sold his house to John Kinzie. In 1804, a stockade was built there and named Fort Dearborn. During the war of 1812, the fort was captured and men, women, and children, were massacred. The fort was reconstructed in 1816 and about it rose a small village which has grown into the present Chicago.

Today, Chicago, is the second largest city in the United States and fifth largest in the world. The population is 3,620,962. The area is 211.3 square miles. Chicago is the greatest livestock and meat-packing center on the globe and the Chicago Union Stockyard is the world's largest. Chicago is also the largest railroad center and the most important grain market in the world.

THE SEQUOIA REDWOOD TREES

The sequoia trees are among the oldest living things on earth. There are two different kinds. One is the redwood sequoia and the other is the giant sequoia. Both are very large trees and live to be thousands of years old.

The redwood grows only in the mountains near the Pacific Ocean in southern Oregon, and more than one-half of the northern part of California.

The tallest redwood is 365 feet high and is called Founder's Tree. It is said that it is the tallest tree in the world.

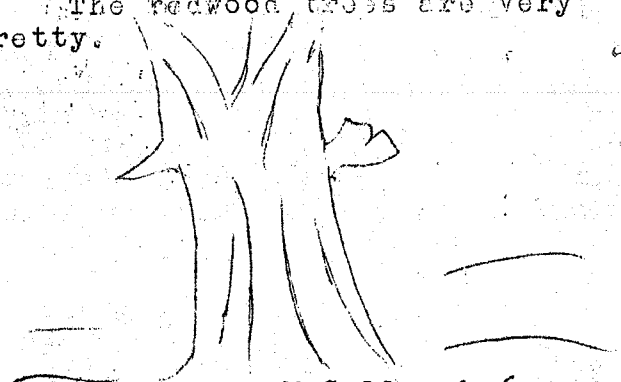

The word redwood comes from the reddish color of the wood.

The wood is used for woodwork and for the siding of houses.

The largest redwood trees, contain enough wood, in each tree, to build several houses.

The redwood trees' leaves, are flat needles about an inch long.

The redwood trees are very pretty.

-Miriam McCullough-6

MRS. SHERMAN'S ROOM
(cont'd)

**

GRAND CANYON

The Grand Canyon is in Arizona. It is the largest canyon in the world.

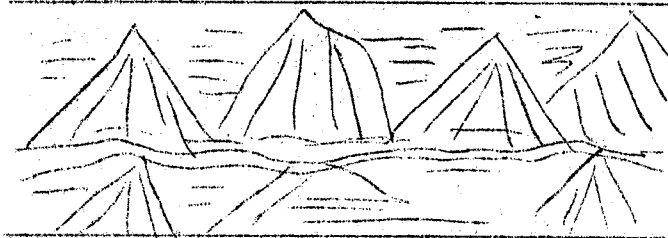

The gigantic canyon is hidden, so that you come on it suddenly. You are in high country, but on a flat plain covered with nice smelling pine woods. You walk a few hundred feet farther and right at your feet is a drop a mile deep, four to eighteen miles across, and two hundred seventeen miles long. The best way to see the canyon is to walk to the rim and look.

The noisy Colorado River rushes at the bottom of the canyon. What you see is a cross-section of the earth crust. The sides of the canyon are made of rocks, cliffs, ridges, hills, and valleys of every form. Many of the ridges have weather-carved lines which resemble Chinese temples. Both rims of the canyon are covered with thick forests. The highest points of the rim are about 9,000 feet above sea level.

The most surprising beauty of this canyon comes from the colors of its rocks. These rocks were formed millions of years ago. They were gradually pushed down as each layer of new rock was formed. If you look down into the deepest part of the canyon where the Colorado River is, you would see the rock is dark and quite different in texture from all the other layers. That's the original land that went under the sea. Geologists call it the "basement." There are many layers of different colored rocks. All the rock layers except the dark ones have fossils of early animal and plant life.

To the experts, then, the canyon's layers of rocks are like pages

of a picture book, showing the past. It's more than a scenic wonder. It is a history of life on our earth.

-Jean Prior-6

**

MAMMOTH CAVE

I am writing about Mammoth Cave for this issue of Western Wind-up. Mammoth Cave is the largest cave in the world.

Mammoth Cave is 100 miles south of Louisville in Kentucky. It covers more than 79 square miles of hill country. The lowest level of the five different levels in the cave is 350 feet below the surface. The cave is filled with beautiful rock formations called stalactites and stalagmites. The formations have the shapes of flowers, fruits, trees, and waterfalls. They are colored red, white, yellow, and purple.

It contains 8 waterfalls, 3 rivers, and 2 lakes. The largest stream is Echo River, which is from 20 to 60 feet wide.

One of the many wonders of the cave are the fish without any eyes. There are also blind crickets and beetles, in the cave. There is a mummy of an Indian in a glass case, there.

Mammoth Cave was supposed to have been found while a hunter was tracking down a wounded bear. The hunter's name was Robert Houchins and the date was 1799. The cave did not become known until after the war of 1812. Saltpeter was used to manufacture gun powder then and there was a great strike of it found, in the

MRS. SHERMAN'S ROOM
(cont'd)

**

cave. After the war, the park was open to the public. It became a national park in 1936.

Today, thousands of people visit the cave everyday.

SPELLING

In Mr. Hamilton's room, all the children, are trying to get a perfect paper in spelling.

He promised all the room a picnic if there was a perfect room, but one or two people always miss words.

Last week, there were only seven people who missed words.

There were 18 perfect papers.

-Ralph Weese-5

**

OUR BULLETIN BOARD

The pupils of Mr. Hamilton's 5th grade are trying to learn more about different states. Mr. Hamilton appointed every pupil to write at least one letter to a state. This would, also, help the boys and girls in language and in writing business letters.

In a few weeks, the pupils began to get answers back from their states. Mr. Hamilton said that the boys and girls could put their state maps or folders on a

large bulletin board in the back of the room.

Now we have maps and folders of California, North Dakota, Ohio, Pennsylvania, New Hampshire, San Antonio Texas, Louisiana, and many other states. We have learned a lot from our bulletin board.

-Jean Bryner-5

**

SCIENCE EXPERIMENTS

In science class, we were showing experiments. Jean Bryner and Karen Noblet were showing the experiments. They took a small-necked bottle and put some water in it. Next they put paper on the top of the bottle and turned it upside down. The water stayed in because of the pressure. Maybe you would like to try the experiment in your class.

-Brenda Collins-5

**

RADIO REPAIR

Our class has a few radios to work with. Some of them are hard to manago. We have to take them completely aprt. I think it is fun. We receive small shocks, when working with them, but we keep on working. When the things we need to fix them, get here, we will set a speaker up the front of the room.

-Jim Balyeat-5

**

A BOOKLET FROM WISONSIN

My booklet from Wisconsin has fishing regulations in it. It, also, includes a highway map and locations for good fishing. The musky is the best fish. The sports they have are swimming, golfing, waterskiing and skiing at Mt. Telemark, near Cable.

-Larry Petee-5

MR. HAMILTON'S ROOM (cont'd)

**

MY HOBBY

My hobby is collecting dolls. I think it is a lot of fun, and very exciting. So far, I have the Queen of France, the Queen of England, and the Queen of Spain. I have many others, too.

-Judy Hampton-5

**

OUR CHEER LEADERS

Four girls from Mr. Hamilton's room have formed a cheer leading group. The girls are: Patty Thompson, Jean Bryner, Karen Noblet, and Vicki Zartman. We have formed this group as we hope to be cheer leaders in junior highschool and highschool such as Barbara Balyeat, and Shirley Paller. We have a theme song and a lot of cheers. Some cheers are: Bobby Socks, A Bottle of Pop, Charlie McCarthy, Dorothy Lamore, Jumping on a Bandstand, and Extra! Extra! We would like to cheer at basket-ball games, and socker games.

-Vicki Zartman-5

SPELLING CONTEST

Both of the fifth grades are going to have a spelling tournament, together. There will be 234 words. We will have it March 20th. They will come to Miss Miles' room. All I have to say, is, "May the best team win." In the next issue, we will tell you how the contest turned out.

-Cynthia Petan-5

WORM EXPERIMENT

We talked about worms and their backbone. We wanted to see if they had any, so finally when Douglas Thompson brought one in, we used it for our experiment.

We were experimenting and I stuck my finger in front of the worm. What do you think happened? The worm turned away from my finger. We kept doing this. The worm kept turning away.

Finally we cut the worm in half. Both parts were still moving. This is what it was like.

Front

-Carl Dinger-5

**

ART SPECIAL RECOGNITION

Miss Miles' fifth grade made a cave frieze, for the play, "Tom Sawyer." It showed the stalactites coming down from the roof of the cave, and stalagmites going up from the floor of the cave. We painted it yellow, brown, pink, blue, turquoise, and purple.

It was taken out to the Kingwood Center Art Exhibit and won a special recognition.

-Andrea Wilson-5

**

TRANSPORTATION FRIEZE

Our class painted a transportation frieze. Each person was in a group and had a leader. Each group had a space where they were to paint.

Some of the ways in transportation we painted, were, all kinds of airplanes, cars, boats, trains, bikes, and horsedrawn wagons.

We looked up information and

MISS MILES' ROOM (cont'd)

and learned when each of the different means of transportation was used.

If you would like to see it, go to the Art Exhibit at Kingwood Center.

-Sharon Shaull-5

-Hank Kocial-5

**

ENAMELING KILN

Miss Miles' room has a kiln. It heats up to 14 hundred degrees. We are going to make some jewelry, enameling on copper. Some of the shapes will be horses, fish, and squares. It will be lots of fun.

-Dicky Ezzard-5

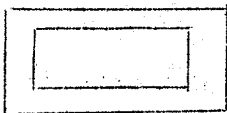

**

MR. MITCHELL AND THE BELLS

Mr. Mitchell came to our room and brought bells with him. The bells were numbered all the way up to 10.

One of the boys had number one. We had fun with the bells.

After we found out how to use them, we got our song books out and played a song called, "Leron, Leron." He put the numbers on the board so we knew what numbers to play on. After one group finished playing, another group then had their turn.

-Susan Kistler-5

**

CLASS TOURNAMENT

Our class is having a spelling tournament. We have leaders. The leaders are Douglas Thompson and Jeannette Hill. Douglas Thompson's team is called The Black Hawks.

Jeannette Hill's team is The Tigers.

The Black Hawks have 21 points.
The Tigers have 29 points.

-Jeannette Hill-5

**

STICK FIGURES

We made a few stick figures out of sticks, clay, and crepe paper. We first got a stick that looked something like this. If you couldn't find one like that, then you would have to tie the pieces together, then we would put clay for the head, hands, feet, like this. Then you would wrap crepe paper all around its hands, feet, and head.

You would then decorate it anyway you wanted to. When we finish it, we will put health articles in its hands such as a tooth brush, fruit, and vegetables.

-Ingrid Wilhelm-5

**

OUR MARBLE FIGURES

Our teacher brought up clay from the stock room. We wanted it to get soft so we added a little bit of water to it. It was cut into squares and round balls. We each took a piece and started to shape things. When we got through making shapes, we put them on a table to let them get hard. When the articles were hard, we painted them. After they were dry, we shellacced them.

The things were: a turtle, an Indian, a face of Washington, a rabbit, a crocodile, a spotted bird tray, swans, and others.

-Diana Foulty-5

MISS MILES' ROOM
(cont'd)

A DAY TO REMEMBER IN OHIO

I have lived in the Philippines, in Japan and in many states in the United States but last week I spent a day on a farm in Ohio that I will never forget.

My family and I went to a farm 25 miles from Mansfield. First of all we went to a large red barn. There were about thirty cows outside. Inside we were allowed to get right in the pens with the baby calves and pet them.

Then our friend who was showing us his 500 acre farm went to another barn and came riding back on a tractor and hitched the tractor to a wagon of hay and in we piled on the hay. Away we went to the maple forest. We were delighted for we had not expected a hayride.

We drove down the main road, then to a side road by the farm house and behind the house across the fields where no car could go. Then deep in the forest we stopped and got out and walked -- across a tiny stream, and up a small hill, and there sat a little hut with steam pouring out the cracks in the roof and the sides. We went inside and the steam was pouring up like a Japanese hot bath. We could barely see each other.

The clear, almost tasteless sap was pouring in the boiling vat from a pipe at one end of the room and as it boiled, it went into different vats until it became concentrated syrup in the last one. Wood fires underneath kept it boiling. We stuck our fingers in to taste until the little old man in charge finally poured glasses

of the syrup for us to drink. I ran outside and got a piece of snow and poured some of my syrup on the snow and was it ever good!

It takes 60 gallons of the sap to boil down to make one gallon of pure maple syrup.

We went outside again and learned how the sap is taken from the maple trees. A hole is drilled into the tree with a brace and bit. Then a spile is put into the hole, a bucket is hung on the spile and the sap runs through the spile and drips into the bucket.

We walked deeper and deeper into the forest looking at the maple trees. Some trees had as many as three buckets hanging on them, but most had only one. Before long a man came up driving a jeep with a tank on the jeep that holds 500 gallons of sap. We ran in all directions to help empty the sap buckets into the tank on the jeep. We learned that the buckets had to be hung back on the trees straight so the sap would not spill and be wasted. We ended up with one bucket left over and had to search for the tree that needed the bucket.

The trees are tapped for about a month, usually from the middle of February to the middle of March.

After much walking and one more taste of maple syrup in the maple house, we got back on the haywagon and away we went out of the forest, across the fields, (a pheasant flew out of the fields as we went past,) and back to the big red barn where the thirty cows were being milked. We said goodbye to the calves, thanked our host and drove back to Mansfield with many fond memories of a day in a maple forest in Ohio.

BIRDS

We made pictures of birds with water colors, Friday March 1. Some of the children painted pictures of the Cardinal, Bluebird, Robin, and many others. I painted a Hummingbird.

Before we started to paint the birds, the children who had brought some pictures of the birds, showed them. The children that had pictures showed them so the children that didn't have pictures would be able to get a picture in their minds of what they were going to paint.

-Kathy Klippel-4

**

SECRET INK

Put a little water in a small dish. Dissolve as much baking soda, as you can, in the water. Use a new pen that has never touched ink. Write a secret message with the baking soda water. To read the secret message, warm the paper very carefully over a candle flame. Be careful not to hold the paper too close to the flame or it may catch fire.

-Julia Jerger-4

**

SOMETHING NEW

One day Mr. Hartmann came into our room with a big stack of books and boys with books were following him. That day we cleaned our desks out. When the teacher had checked our desks and they were neat, the teacher gave us a Science Book. That day we read the first chapter. It was called Night Comes. I'm having fun reading it.

-Shirley Shade-4

SEVEN WONDERS OF THE WORLD

Cinerama is the most wonderful show I have ever seen. When the curtains part and the music starts, it is breathtaking. You forget that you are in a show. You journey along with Lowell Thomas to the far corners of the earth, seeing such wonderful creations of nature.

-Jo Ann Pickens-4

**

EASTER BUNNIES

One day Jack Mist and Peter Dun decided to be Easter bunnies. They made bunny costumes. They, also, colored eggs and bought candy. They put the eggs and candy into pretty baskets. On Easter morning they gave them to their mother and father. Then mother gave one to them. They had a very happy Easter.

FUN ON THE FARM

Last Sunday on March 3rd., my family and I went to my grandmother's farm. We took along my kite and flew it there. Our kite flew higher than ever before because there were no trees to catch it. After awhile, we went in and played with our dolls. Then we got cleaned up and we saw one show. Then we went home.

-Nancy Prior-4

**

MY EASTER STORY

The night before Easter, I crept down the stairs to hear a thump, thump. I hid myself behind a chair and all of a sudden a white face appeared. It was the "Easter Rabbit," in a fine white suit. He held eight baskets. He hid one behind a lamp, three on

MISS WOLF'S ROOM (cont'd)

the fireplace, and one behind a flowerpot. I tiptoed upstairs just in time to see him hop over to my neighbors' house.

SPRING IN ART

It looks like Spring is here, in Mrs. Martin's room! Some of the pupils, in our class, made birds and others made flowers. We, also, made cut-outs of paper sculpture. Spring in Art is so much fun! Don't you think so?

-Susan Livensparger-4
**

SCIENCE

We have a new science book. It has many interesting things such as: Night and Daytime Insects, Growing Plants, Dissolving Things, and many others. We read dissolving things. We made a filter out of a paper towel. My friend and I tried pepper, salt, epsom salts, and cocoa. We found out that pepper just mixes and salt dissolves. We found out many other things, too.

-Nancy Griffith-4
**

OUR WEATHER CHART

We have a weather chart, in our room. Everyday we mark the chart. If it's sunny warm we use yellow, if it's sunny cold, we use blue, if it's cloudy, we use light gray, if it's going to rain, or is stormy, we use dark gray, if it's blustery, we use red, if it's snowing, we use

white, if it's terrible, we use black. We use colored paper to show the different colors on our charts.

-Kay Ann McKee-4
**

OUR BOOK AND MOVIE REPORTS

In our book report, we have to read a book and then write about it. First we tell who wrote and illustrated it. Next we have to tell when it was written. Then we have to give the characters, and tell an interesting part of the story.

In our movie report, we have to watch a movie and write about it. We have to give the title.

-Sue Snyder-4
**

MY TEETH

I got my first teeth, when I was five month old, and when I was seven months old, I had eight teeth. I had all my baby teeth, when I was eighteen months old. My first tooth came out when I was five years old. I think I have all my baby teeth out, now.

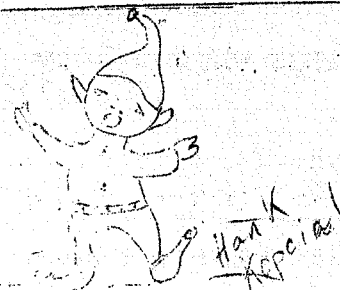

When I graduated from kindergarten, I had my right front tooth out. I looked rather funny in the picture.

I got braces on my teeth, when I was five and a half years old and had them on for three years. I had them off for a year not, but I will get them put back on in February.

While I wore my braces, I had to clean my teeth everytime I ate something. I had to get my braces checked every week or two. I went to the dentist every four months. I have six fillings. Now I clean my teeth four or five times a day.

-Sally Linn-4

JOKES

Jim: Why is tennis a noisy game?

Bill: Because each player raises a racket.

**

Sue: Which would you rather have?
A lion eat your or a tiger?

Jane: I'd rather have the lion eat the tiger.

**

If you were invited out to dinner and found nothing on the table but a beet, what would you say?

Well, that beet's all!

**

Lynn: When is corn like a question?

Becky: When you are popping it.

**

Teacher: Where was King Arthur crowned, Sal?

Sal: On his head, of course.

**

Mr. Black: I'm steaming hot.

Stranger: How do you do? I'm Sam Blair.

**

A doctor gave a little girl a shot and she grabbed her arm. The doctor said, "Why are you holding your arm?" The little girl said, "Because it hurts." The doctor said, "But I gave it to you in the other arm."

**

John: What did one ghost say to the other ghost?

Sam: Do you believe in people?

**

Phil: Do you want to be on my team?

Bill: What team?

Phil: My twenty mule team. I need another mule.

**

Jim: What did one angel say to the other angel?

Larry: I don't care what anyone says, "I'm thirsty."

**

Mother: Take a bath, today, Dick?

Dick: No, Mom, I didn't. Is there any missing?

**

Policeman: What's the matter sonny?

Small Boy: Did you happen to see a lady without a boy who looks like me?

**

Judge: And why did you park your car there?

Lady: Well, the sign said "Time For Parking."

**

Susan: What has one head and foot and four legs?

Ann: I don't know.

Susan: A bed.

**

Jack: What goes up but never comes down?

Dan: I don't know.

Jack: Smoke.

**

Cathy: Hello, is Red there?

Tom: Red, who?

Cathy: Red Pepper, isn't that hot?

**

Judy: What did the dog say when he sat beside the fire?

Bob: I don't know.

Judy: Hot Dog!

**

Fred: Why do you buy clothes?

Hank: Because we can't get them free.

A VISIT TO THE PLANETARIUM

Last year I went to the Pittsburgh Planetarium. It was a wonderful place. First I went to the Hall of Space. It was dark but I could see a button with the word PRESS under it. I pressed it and a magnificent show went on. There were other buttons and other shows. I pressed them all and saw all the shows. After that, I went to a room with a bicycle hooked up to a generator. When anyone rode the bicycle, the generator would light a bulb. Then I went in the main hall. There hanging from the ceiling was a pendulum. There were pegs standing up under it. Every peg the pendulum knocked down counted ten minutes. This worked by the turning of the earth. There, also, was a man wearing a space suit. He told what it would be like to be in space.

-Terry Squire-4

**

EASTER IN GERMANY

On Easter day in the morning we make a nest. Then after an hour we went back to see what we had in our nest. If you had an egg or two, in your nest, you were lucky. Then you go back to the house and find another basket of eggs the Easter Rabbit had brought.

AT THE Y.W.C.A.

Every Saturday, I go to the Y. I go for the girls' dip. We always go in the big pool. I can sit on the bottom and do the front float. I can, also, do the jellyfish float. Our teacher is Mrs. Detrick.

-Barbara Oster-4

**

THE DEER

We went down to the waterworks to see the deer. At first, a female jumped the fence and hurt herself. The man who owned the place took her to the vet. The vet fixed her up. Then she had a baby. In a while, the man that owned it, opened the gate, but the deer wouldn't go. Then a buck jumped the fence, and made it. So that is what happened.

-Jeff Favis-4

**

THE WOODS

We went to the woods one day. My dad and I caught a hawk that wouldn't fly. He looked at dad and me.

Then we said good-bye.

EASTER TIME

Yummy! Yummy! Yummy!
Goodies in your tummy,
Purple eggs and green ones, too,
I wonder how they'll taste to you.
Baskets full of treats,
They are mighty good to eat.
Jelly beans and chocolate bunnies,
Yummy! Yummy! Yummy!

-Margo Biener-4
**

THE EASTER BUNNY

There once was an Easter bunny,
He had a basket of eggs.
Hopping along so happy,
Jumping on his little legs.

JAPAN

Let's take a pretend trip to Japan
And see all the dancers, dolls, and
fans.

Japanese have yellow skin and
slanting eyes.
Their food is mostly rice, just
think, no apple pies.
Would you like to live in Japan?
Purple eggs and green ones, too,
The dancers are men in Japan you.
The dolls cannot be touched by hand.
Their fans have designs and can be
made of silk and chocolate bunnies.
And in Japan they drink tea instead
of milk.
Would you like to live in Japan?

In your country of Japan they are
very different
Most of them don't observe religious
days as we do, lent.

I hope you've learned a thing
or two
I've tried to tell you quite a
few.
Would you like to live in Japan?
-Andrea Wilson-5

SPRING IS HERE

The snow has melted. The birds are
near.
Do you know Spring? When it is
here?
I saw a robin, yesterday in Japan.
He flew so fast and flew so gay.
Next I saw a pussy-willow
They're so soft, just like my
pillow.
Now, that I've found some signs
of Spring, the happy time.
Will you be doing different things?

COOK'S CORNER

MEAT BALLS IN TOMATO SAUCE

Mix together 1 lb. ground chuck, 1 tsp. salt, dash of pepper, 2 tbsp. rice (uncooked).

Shape into small balls. Brown balls on both sides in 1 tbsp. butter. Then pour 1 can Tomato Paste over the meat balls. Let simmer for $\frac{1}{2}$ hour.

Paul Thomas - 3

HAMBURGERS

$\frac{1}{2}$ cup of rolled - oats

1 egg

3 tablespoons of water

Mix one pound of hamburger with this. Fry in butter.

It makes very good hamburgers.

Brenda Harris - 6

COMPANY CASSEROLE

1 package (6oz.) egg noodles
1 can Campbell's Cream of Mushroom Soup

1 cup milk (or $\frac{1}{2}$ cup evaporated milk with $\frac{1}{2}$ cup water).

1 cup processed American cheese, cubed.

Dash of pepper

2 hard-cooked eggs, chopped

1 can (7oz.) tuna fish

$\frac{1}{2}$ cup flaked dry cereal crumbs, buttered

Heat oven to 350° F. (Moderate)

Cook noodles in boiling salted water until tender.

Empty soup into a pan and stir well; then add milk and heat;

add cheese; stir until cheese melts.

Combine noodles, pepper, eggs and tuna fish with sauce.

Put into a 2 quart greased casserole; sprinkle buttered flaked cereal crumbs over the top and bake at 350° F. for 30 minutes.

Makes 8 servings.

Eve Snyder - 4

YELLOW CUPCAKES

1 cup sifted flour

$\frac{2}{3}$ cup of sugar

$\frac{1}{4}$ teaspoon baking powder

$\frac{1}{2}$ teaspoon salt

$\frac{1}{4}$ cup spray

6 tablespoons milk

$\frac{3}{4}$ teaspoon vanilla

1 egg

Put flour, sugar, baking powder, salt, spray and milk in mixing bowl. Mix with spoon or electric mixer for two minutes. Add egg and vanilla and beat one more minute. Put in cupcake pans and bake for 15 minutes at 375°. Makes 10 or 12 cupcakes.

Kurt Budea - 4

OATMEAL COOKIES

1 egg

$\frac{1}{2}$ cup melted shortening

1 cup brown sugar

1 teaspoon vanilla

1 cup flour

$\frac{1}{4}$ teaspoon soda

1 teaspoon baking powder

$\frac{1}{2}$ teaspoon salt

2 cups rolled oats

Beat together the egg yolk, shortening, brown sugar and vanilla. Sift in the flour, soda, baking powder and salt. Add the oats with the egg white beaten stiff, and fold in. Drop by small teaspoons on lightly buttered pan. Bake 15 minutes in 375° oven.

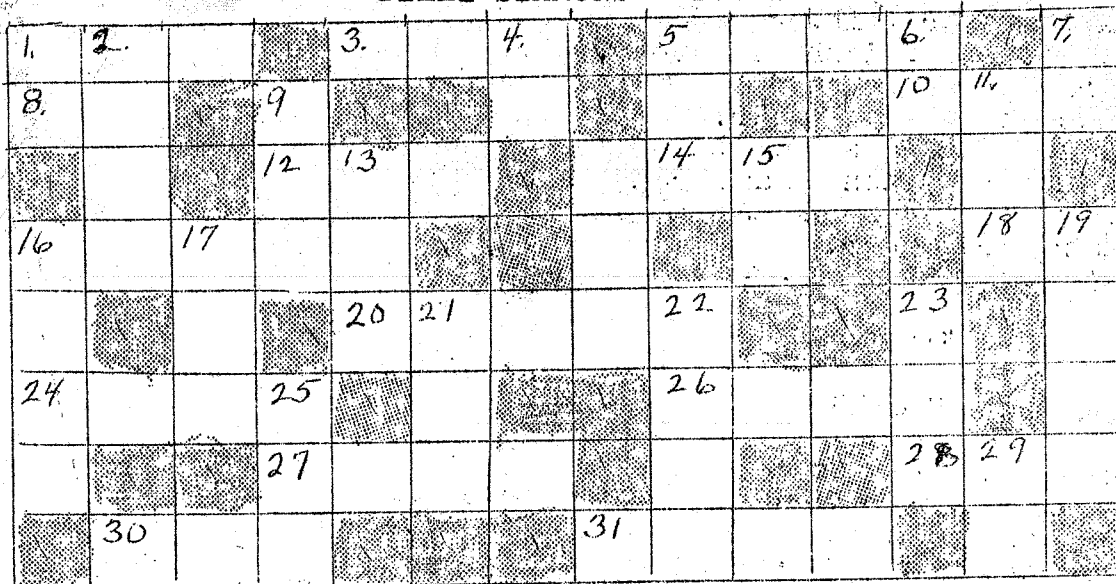

Ronald Stevens - 5

PUZZLE
